# GREETINGS FROM NORWOOD GARDENS

## HI THERE:

Another year has rolled around and we take this opportunity to say a special THANKS, to our friends and customers of the past season and also to those new folks who will order from us this year for the first time.

We also offer a special invitation to you to visit our garden and see our flowers in bloom, we have something blooming almost every day in the year or if you just want to talk about our favorite flowers come on anyway the coffee pot is always on.

To get to our garden come out the San Bernardino Freeway to Peck Road, then north to Lower Azusa Road, turn right to Cogswell Road, then right on Hallwood 'till you see our sign.

Phone Gilbert 8-0049  
or Gilbert 8-1104

## TERMS:

Cash with order, check, draft, or money order. All orders Postpaid over 4.50 in the United States. On orders less please send along 50c postage unless noted on some collections.

Our main shipping season is from June 1st until December 1st. Although we will ship any time by special request and it is possible.

## OUR GUARANTEE:

We guarantee all plants true to name and free from pests. Also if the plants fail to survive we will make an adjustment. All plants are fresh dug for each order. All plants sold by us are grown in our gardens.

## IN ORDERING :

We do not substitute unless requested. All plants are in good supply this year so this probably will not happen. If we may substitute please send along a list of some you would like for we are very generous with the extras in each order. We do not give a percentage extra for our prices are lower than most gardens in fact some offerings are below wholesale prices.

## GIFT ORDERS:

Over the past few years we have been noting a trend to send gift orders of iris and daylilies. So if you have this mind too, let us know what the occasion is for and we will send a proper card along with your name.

## HEMEROCALLIS - DAYLILIES

Here you will find listed some of the worlds best perennials. As we have repeated every year since we began listing daylilies, "Daylilies are one plant that should be in everyone's garden". It has been quite amazing the popularity they have gathered.

They bloom from spring 'till frost. More bloom scapes are produced and the flowers are larger as each year passes. Making them "permanent beauty in your garden". No pests or diseases seem to bother them, for they go right on blooming year in and year out even with neglect. Of course the more care and water you give them the more they will reward you. Most all varieties listed are hardy from Canada southward. So make it a point this year to plant a little corner of your garden with them. We know you won't be disappointed.

And now a few tips on planting and caring for your daylilies you will order this year:

1. The time to plant is NOW. The sooner you plant the sooner you will have bloom.
2. Plant in any good garden soil with the root-leaf union about 1 inch under ground, being careful to spread the roots out.
3. Water well to settle several times, and weekly thereafter.
4. Never use a fertilizer high in nitrogen for all it will do is promote a lot of leaf growth and little bloom. A good rule to follow on fertilizing is to use a little often instead a lot several times a year.
5. Plant in full sun and if you have some darker shades put them where they get just a little shade for this tends to make the colors deeper and brighter.

The divisions we send out are large and heavy. In all instances when stock permits they will be double or better. WE SEND DAYLILIES ANY TIME OF THE YEAR WHEN OUR WEATHER PERMITS DIGGING.

## ONCOBREDS

In this section you will find one of the most interesting types of bearded iris grown today. All of them are descendants of iris that come from in and around the Holy Land. As a rule it is quite hard to grow these native species, but thanks to our modern day hybridizers who have crossed and recrossed these natives with our regular bearded iris which grow so well; we have now plants which grow quite easy and have flowers that look a great deal like the wild species. As a rule most of these listed are quite hardy in the open, but some will need a little protection in the coldest areas. In all cases we will advise you when you order a tender variety. So this year if you do not grow any of these listed order a couple and tuck them in somewhere. You won't regret it.

## TABLE INTERMEDIATE AND FALL BLOOMING IRIS

We find a growing interest in these shorter and smaller cousins to the tall bearded varieties. This year we are again listing the Tables, Intermediates, and Fall Bloomers together. The shorter bloom stalks and smaller blossoms make them ideal for arrangements and also stand up to the weather better. Most all listed will grow quite fast and produce quite a large clump the first year.
